Advisory Action Before the Filing of an Appeal Brief	Application No. 10/801,384	Applicant(s) MAN ET AL.	
	Examiner Frank Vanaman	Art Unit 3618	

--The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

THE REPLY FILED 21 December 2005 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.

1. ☒ The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:

- a) ☒ The period for reply expires 4 months from the mailing date of the final rejection.
 b) ☐ The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.

Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

NOTICE OF APPEAL

2. ☐ The Notice of Appeal was filed on _____. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a).

AMENDMENTS

3. ☐ The proposed amendment(s) filed after a final rejection, but prior to the date of filing a brief, will not be entered because
 (a) ☐ They raise new issues that would require further consideration and/or search (see NOTE below);
 (b) ☐ They raise the issue of new matter (see NOTE below);
 (c) ☐ They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or
 (d) ☐ They present additional claims without canceling a corresponding number of finally rejected claims.

NOTE: _____. (See 37 CFR 1.116 and 41.33(a)).

4. ☒ The amendments are not in compliance with 37 CFR 1.121. See attached Notice of Non-Compliant Amendment (PTOL-324).
 5. ☐ Applicant's reply has overcome the following rejection(s): _____.
 6. ☐ Newly proposed or amended claim(s) _____ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).
 7. ☒ For purposes of appeal, the proposed amendment(s): a) ☐ will not be entered, or b) ☒ will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended.
 The status of the claim(s) is (or will be) as follows:
 Claim(s) allowed: _____
 Claim(s) objected to: 21-26.
 Claim(s) rejected: 1-8, 10, 11 and 13-20.
 Claim(s) withdrawn from consideration: 9 and 12.

AFFIDAVIT OR OTHER EVIDENCE

8. ☐ The affidavit or other evidence filed after a final action, but before or on the date of filing a Notice of Appeal will not be entered because applicant failed to provide a showing of good and sufficient reasons why the affidavit or other evidence is necessary and was not earlier presented. See 37 CFR 1.116(e).
 9. ☐ The affidavit or other evidence filed after the date of filing a Notice of Appeal, but prior to the date of filing a brief, will not be entered because the affidavit or other evidence failed to overcome all rejections under appeal and/or appellant fails to provide a showing of good and sufficient reasons why it is necessary and was not earlier presented. See 37 CFR 41.33(d)(1).
 10. ☐ The affidavit or other evidence is entered. An explanation of the status of the claims after entry is below or attached.

REQUEST FOR RECONSIDERATION/OTHER

11. ☒ The request for reconsideration has been considered but does NOT place the application in condition for allowance because:
See Continuation Sheet.
 12. ☐ Note the attached Information Disclosure Statement(s). (PTO/SB/08 or PTO-1449) Paper No(s). _____
 13. ☐ Other: _____

PRIMARY EXAMINER

Continuation of 11. does NOT place the application in condition for allowance because: Applicant's arguments are not persuasive. Applicant has argued the interactive rotary connection sets itself, and the examiner noted in the previous office action that the 'interactive connection' may include other elements such as controller 50 - more specifically, from the final office action: "and being in the form of an interactive connection (50, 16, CE1, CE2) including at least one gear pair ..." (from the statement of rejection); and "(1) the connection may comprise the controller 50, and (2) the nature of a differential gear set allows plural ratios to be achieved based on the particular speeds of the plural input and output shafts, which is a function inherent in a differential gear set, to the breadth that applicant is actually claiming this feature in the claims." (from the comments at page 5 of the office action). Applicant continues with the assertion "[t]his feature is described throughout the present application" - and while this may be so, the breadth of applicant's claim recitation allows the reference to Tabata et al. to be applied, inasmuch as an interactive connection including 16, 50, CE1 and CE2 is capable of setting itself due to the inclusion of element 50. It is not appropriate for an examiner to read unclaimed limitations into the claims when applicant argues that such limitations are disclosed in the specification (the basis for which may be found at pages 5-6 of the Final Office Action). The examiner notes that applicant's claims 21-26, which actually describe the nature of the self setting connection, have not been rejected as being anticipated by or unpatentable over the prior art. As regards applicant's comments directed to the reference of Brinkmeyer et al., this reference has not been relied upon to teach the provision of a free wheel clutch, nor a generator which cannot be used as a motor, but rather that it is very old and well known to connect rotary elements to one another using a sheave and belt connection, as can easily be determined by the statement of rejection as set forth in the office action. There has been no attempt set forth by the examiner to incorporate the entirety of the reference to Brinkmeyer. If applicant believes that it is not old and well known to connect rotary power elements with a pulley and belt, and that such a connection would not be well known to the ordinary practitioner, then applicant should explicitly state so, and support such an assertion with evidence.
